

What's New at Unique Glass Colors

October 2011

“Unique” Unique Glass Colors, New Classes and Website Info are WHAT’S NEW here at UGC!

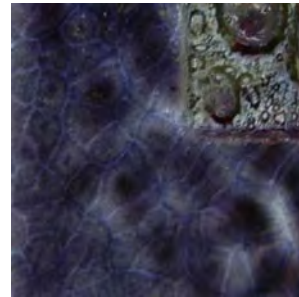

New Colors/Products

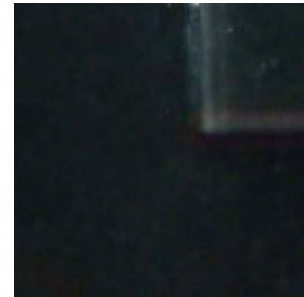

Forest

Smoked Gold

Purple Haze

Warm Black

We are calling these four colors “Unique” Unique Colors because we only have a limited supply of them and when they are gone, they are gone for good. These colors are great for artists who are looking for something a bit different to add to their work. Look under Shop then Unique Color Lines to see a full description of each color.

We have added some new items due to customer requests. You can now order float glass frits in Fine, Coarse and Tempered. They are located under Shop then click on Supplies. These frits can be colored with our UGC Colors for custom frit color.

Float glass blanks are also available under Supplies. We have rounds, and ovals in various sizes. Most of the Free Projects in the Newsletters use the 10” rounds.
